

# 3807 - Bluestone River Water Treatment Plant Retention Project

## Application Details

---

**Funding Opportunity:**  
3293-Virginia Community Flood Preparedness Fund - Project Grants - CY25 Round 6

**Funding Opportunity Due Date:** Dec 1, 2025 11:59 PM

**Program Area:** Virginia Community Flood Preparedness Fund

**Status:** Under Review

**Stage:** Final Application

  

**Initial Submit Date:** Dec 1, 2025 7:58 PM

**Initially Submitted By:** Bethany Whitfield

**Last Submit Date:**

**Last Submitted By:**

## Contact Information

## VCFPF Applicant Information

---

### *Project Description*

**Name of Local Government\*:** Tazewell County

Your locality's CID number can be found at the following link: [Community Status Book Report](#)

**NFIP/DCR Community Identification Number (CID)\*:** 510160

If a state or federally recognized Indian tribe,

**Name of Tribe:**

**Authorized Individual\*:** Eric Young  
First Name Last Name

**Mailing Address\*:** 197 Main Street  
Address Line 1  
Address Line 2  
Tazewell Virginia 24651  
City State Zip Code

**Telephone Number\*:** 276-385-1208

**Cell Phone Number\*:** 276-385-1208

**Email\*:** eyoung@tazewellcounty.org

Is the contact person different than the authorized individual?

**Contact Person\*:** No

**Enter a description of the project for which you are applying to this funding opportunity**

**Project Description\*:**

Tazewell County's Bluefield Flood Study (CFPF-24-04-65) identified chronic flooding along Bluestone River. The proposed project will dredge and restore the existing reservoir, add a CMAC-controlled outfall, and build an upstream floodplain retention pond. The project will be incorporated with the Town's Park Masterplan to provide nature trails and open water recreational activity within the proposed Bluestone River Park and supports the 2023 Flood Resilience Plan's mitigation goals.

**Low-income geographic area means any locality, or community within a locality, that has a median household income that is not greater than 80 percent of the local median household income, or any area in the Commonwealth designated as a qualified opportunity zone by the U.S. Secretary of the Treasury via his delegation of authority to the Internal Revenue Service. A project of any size within a low-income geographic area will be considered.**

Is the proposal in this application intended to benefit a low-income geographic area as defined above?

**Benefit a low-income geographic area\*:** Yes

**Information regarding your census block(s) can be found at census.gov**

**Census Block(s) Where Project will Occur\*:** 511850211004 (Census Tract 211)

**Is Project Located in an NFIP Participating Community?\*** Yes

**Is Project Located in a Special Flood Hazard Area?\*** Yes

**Flood Zone(s) (if applicable):** Zone AE/Zone X

**Flood Insurance Rate Map Number(s) (if applicable):** 51185C0231D

## Eligibility CFPF - Round 4 - Projects

---

### ***Eligibility***

Is the applicant a local government (including counties, cities, towns, municipal corporations, authorities, districts, commissions, or political subdivisions created by the General Assembly or pursuant to the Constitution or laws of the Commonwealth, or any combination of these)?

**Local Government\*:** Yes  
Yes - Eligible for consideration  
No - Not eligible for consideration

Does the local government have an approved resilience plan and has provided a copy or link to the plan with this application?

**Resilience Plan\*:** Yes  
Yes - Eligible for consideration under all categories  
No - Eligible for consideration for studies, capacity building, and planning only

If the applicant is not a town, city, or county, are letters of support from all affected local governments included in this application?

**Letters of Support\*:** Yes  
Yes - Eligible for consideration  
No - Not eligible for consideration  
N/A - Not applicable

Has this or any portion of this project been included in any application or program previously funded by the Department?

**Previously Funded\*:** No  
Yes - Not eligible for consideration  
No - Eligible for consideration

Has the applicant provided evidence of an ability to provide the required matching funds?

**Evidence of Match Funds\*:** Yes  
Yes - Eligible for consideration  
No - Not eligible for consideration  
N/A - Match not required

## Scoring Criteria for Flood Prevention and Protection Projects - Round 4

---

### **Scoring**

#### **Category Scoring:**

Hold CTRL to select multiple options

#### **Project Category\*:**

All hybrid approaches whose end result is a nature-based solution, Floodplain restoration

**Is the project area socially vulnerable?** (based on ADAPT Virginia's Social Vulnerability Index Score)

#### **Social Vulnerability Scoring:**

Very High Social Vulnerability (More than 1.5)

High Social Vulnerability (1.0 to 1.5)

Moderate Social Vulnerability (0.0 to 1.0)

Low Social Vulnerability (-1.0 to 0.0)

Very Low Social Vulnerability (Less than -1.0)

**Socially Vulnerable\*:** Moderate Social Vulnerability

**Is the proposed project part of an effort to join or remedy the community's probation or suspension from the NFIP?**

**NFIP\*:** No

**Is the proposed project in a low-income geographic area as defined below?**

"Low-income geographic area" means any locality, or community within a locality, that has a median household income that is not greater than 80 percent of the local median household income, or any area in the Commonwealth designated as a qualified opportunity zone by the U.S. Secretary of the Treasury via his delegation of authority to the Internal Revenue Service. A project of any size within a low-income geographic area will be considered.

**Low-Income Geographic Area\*:** Yes

**Projects eligible for funding may also reduce nutrient and sediment pollution to local waters and the Chesapeake Bay and assist the Commonwealth in achieving local and/or Chesapeake Bay TMDLs. Does the proposed project include implementation of one or more best management practices with a nitrogen, phosphorus, or sediment reduction efficiency established by the Virginia Department of Environmental Quality or the Chesapeake Bay Program Partnership in support of the Chesapeake Bay TMDL Phase III Watershed Implementation Plan?**

**Reduction of Nutrient and Sediment Pollution\*:** Yes

**Does this project provide “community scale” benefits?**

**Community Scale Benefits\*:** 25-49% of the census block

**Expected Lifespan of Project**

**Expected Lifespan of Project\*:** Over 20 Years

**Comments:**

## Scope of Work - Projects - Round 4

---

### *Scope of Work*

**Upload your Scope of Work**

Please refer to Part IV, Section B. of the grant manual for guidance on how to create your scope of work

**Scope of Work\*:** CID510160\_Tazewell County\_CFPF-6\_SOW\_Bluestone River.pdf

**Comments:**

### *Budget Narrative*

**Budget Narrative Attachment\*:** CID510160\_CFPF Round 6\_Budget Narrative\_Bluestone River.pdf

**Comments:**

## Scope of Work Supporting Information - Projects

---

### *Supporting Information - Projects*

**Provide population data for the local government in which the project is taking place**

**Population\*:** 5096.00

**Provide information on the flood risk of the project area, including whether the project is in a mapped floodplain, what flood zone it is in, and when it was last mapped. If the property or area around it has been flooded before, share information on the dates of past flood events and the amount of damage sustained**

**Historic Flooding data and**

**Hydrologic Studies\*:**

CID510160\_CFPF Round 6\_Historic Flooding data and Hydrologic Studies\_Bluestone River.pdf

**Include studies, data, reports that demonstrate the proposed project minimizes flood vulnerabilities and does not create flooding or increased flooding (adverse impact) to other properties**

**No Adverse Impact\*:** CID510160\_CFPF Round 6\_No Adverse Impact\_Bluestone River.pdf

**Include supporting documents demonstrating the local government's ability to provide its share of the project costs. This must include an estimate of the total project cost, a description of the source of the funds being used, evidence of the local government's ability to pay for the project in full or quarterly prior to reimbursement, and a signed pledge agreement from each contributing organization**

**Ability to Provide Share of Cost\*:** CID510160\_Letter of Authorization and Match-Bluefield.pdf

**A benefit-cost analysis must be submitted with the project application**

**Benefit-Cost Analysis\*:** CID510160\_CFPF Round 6\_Benefit Cost Analysis\_Bluestone River.pdf

If applicable, provide the Department with the current floodplain ordinance by link or attachment.

## **Local Floodplain Management**

### **Regulations:**

CID510160\_CFPF Round 6\_Floodplain Management Regulations\_Bluestone River.pdf

**Provide a list of repetitive loss and/or severe repetitive loss properties. Do not provide the addresses for the properties, but include an exact number of repetitive loss and/or severe repetitive loss structures within the project area**

**Repetitive Loss and/or Severe**      CID510160\_CFPF Round 6\_Rep Loss\_Bluestone River.pdf

### **Repetitive Loss Properties\*:**

**Describe the residential and commercial structures impacted by this project, including how they contribute to the community such as historic, economic, or social value. Provide an exact number of residential structures and commercial structures in the project area**

### **Residential and/or Commercial Structures\*:**

Implementation of the Bluestone River Water Treatment Plant Retention Project will provide flood storage on the Bluestone River that will positively benefit 226 properties that are downstream prior to confluence with Beaver Pond Creek at a location just downstream of Downtown Bluefield.

**If there are critical facilities/infrastructure within the project area, describe each facility**

### **Critical Facilities/Infrastructure\*:**

The flood storage aims to reduce the base flood elevations and reduce the limits of the 100-year inundation on these properties. Additionally, the project could eliminate the need for stream and floodplain restoration work at the Reynolds Avenue and Dudley Street neighborhood and upgrades to the Montrose Avenue Bridge construction, which frequently floods and blocks access at this bridge.

**Explain the local government's financial and staff resources. How many relevant staff members does the local government have? To what relevant software does the local government have access? What are the local government's capabilities?**

### **Financial and Staff Resources\*:**

Tazewell County and Town of Bluefield have developed a Planning Team that plays an important role throughout the flood resiliency planning process. Members included a broad range of stakeholders vested in flood control, preparedness, and resilience, including community leaders and emergency response, building, and floodplain management officials. Regional planners from the Cumberland Plateau Planning District Commission (CPPDC), and State Representatives (e.g., Virginia Department of Conservation and Recreation (DCR) and Virginia Department of Emergency Management) were engaged and invited to participate on the Planning Team. Planning Team members met regularly (approximately bi-monthly) and were responsible for providing input throughout the planning process such as understanding of existing and planned projects, plans, and data, review of draft materials, and project prioritization. Some of the planning team members that will be involved with decisions for this project are:

Robyn Boyd, Executive Director, Clinch Valley Community Action

Andrew Hanson, Manager, Town of Bluefield

Eric Young, County Administrator, Tazewell County

Barry Brooks, Fire Chief, Tazewell County Emergency Management

Jeff Buchanan, VDOT

Jane Cordle, Stormwater, Tazewell County

Kenneth Dunford, Director of Engineering, Tazewell County

Brad Gibson, GIS/Mapping, Tazewell County

Gary Jackson, Building Official, Tazewell County

Charlie Perkins, Planner II, CPPDC

Shanna Plaster, Board of Supervisors, Tazewell County

If the project proposed does not employ a nature-based or hybrid solution and the total project cost is greater than \$2 million, describe at least one alternative that could reasonably address the issue identified. Please also consider the No Action Option as a third alternative as part of the analysis. Explain these alternatives and the reason the proposed project was selected.

#### **Alternatives:**

**Identify and describe the goals and objectives of the project. Include a description of the expected results of the completed project and explain the expected benefits of the project. This may include financial benefits, increased awareness, decreased risk, etc.**

#### **Goals and Objectives\*:**

Tazewell County was awarded the Bluefield Flood Study (CFPF-24-04-65) in 2024 and has mostly completed the study. Based on its results, the Town of Bluefield is proposing a flood mitigation project upstream along the Bluestone River to provide flood storage and reduce impacts on downstream neighborhoods and businesses. The study was developed in response to long-standing flooding issues in the Bluefield area, where repeated flood events disrupt businesses and pose safety risks in a low-income community. The study evaluated the root causes of persistent flooding, existing conditions, and potential mitigation strategies, with a focus on nature-based solutions. As a low-income area with a moderate social vulnerability index score, the project will help promote community health, safety, and resilience. Identified as a priority in the 2023 Tazewell County Flood Resilience Plan, the study supports long-term, science-based, nature-focused solutions that account for climate change. A baseline 2D model was developed for the Bluestone River and contributing tributaries, calibrated to historic flooding to understand extents and infrastructure constraints. Based on alternatives analysis and post-project modeling, the Bluestone River Water Treatment property was identified as a suitable location for in-line and floodplain retention improvements. The existing in-line storage facility at the treatment plant intake is proposed to be dredged to restore capacity and retrofitted with a CMAC system. CMAC will draw down storage ahead of storms to increase available flood capacity and then slowly release stored water after peak flows pass. Stored water may also be pumped to the adjacent water treatment facility for supply needs.

An upstream floodplain retention pond is also proposed on Town-owned open space. An overflow channel will divert flows from storm events exceeding the 1-year return period into the retention pond. This pond will also include CMAC valves to manage storage and timed releases back to the restored Bluestone River downstream. The retention area will become an aesthetic and recreational feature as part of the Town's Park Masterplan, incorporating nature trails and open-water amenities.

CFPF funding will support full development and implementation of the Bluestone River Water Treatment Plant Retention Project, including design, modeling, permitting, construction documentation, and funding for construction of the restoration and flood mitigation components.

**Outline a plan of action laying out the scope and detail of how the proposed work will be accomplished with a timeline identifying expected completion dates. Determine milestones for the project that will be used to track progress.**

**Explain what deliverables can be expected at each milestone, and what the final project deliverables will be. Identify other project partners**

#### **Approach, Milestones, and Deliverables\*:**

CID510160\_CFPF Round 6\_Milestones and Deliverables\_Bluestone River.pdf

**Where applicable, briefly describe the relationship between this project and other past, current, or future resilience projects. If the applicant has received or applied for any other grants or loans, please identify those projects, and, if applicable, describe any problems that arose with meeting the obligations of the grant and how the obligations of this project will be met**

#### **Relationship to Other Projects\*:**

Bluestone River Water Treatment Plant Retention Project is being developed through the Tazewell County (CID#510160) Resiliency Plan funded by the 2022 CFPF Grant Award and the Town of Bluefield Flood Study (CFPF-24-04-65) funded by the 2024 CFPF Grant Award. Through the resiliency study, re-occurring flood issues were identified and documented through review of historical rainfall and flooding data, analysis of existing flood

mapping and studies, and community engagement. The Bluefield Flood Study developed detailed HEC-HMS and rain on grid hydrologic studies and 2-D HEC-RAS modeling utilizing historic rain and runoff events to calibrate the model with documented flood stage observations. Through communication with the Town of Bluefield, properties owned or controlled by the Town were evaluated for flood storage options to reduce or delay the flood peaks that often result in flooding of neighborhoods and businesses. Implementation of the Bluestone River Water Treatment Plant Retention Project will also add numerous recreational benefits planned as part of the Town of Bluefield Parks and Recreational Master Plan to the Bluefield City Park property by creating nature trails, and open water recreation.

**For ongoing projects or projects that will require future maintenance, such as infrastructure, flood warning and response systems, signs, websites, or flood risk applications, a maintenance, management, and monitoring plan for the projects must be provided**

**Maintenance Plan\*:** CID510160\_CFPF Round 6\_Maintenance Plan\_Bluestone River.pdf

**Describe how the project meets each of the applicable scoring criteria contained in Appendix B. Documentation can be incorporated into the Scope of Work Narrative**

**Criteria\*:**

**1. Eligible Projects**

The project centers on floodplain restoration and creation of two retention ponds (one offline and one existing in-line pond), both integrated into the Bluestone River flood system. Activities include dredging, channel stabilization, floodplain reconnection, and native replanting. These are all nature-based flood mitigation strategies that restore floodplain function, improve hydrology, and reduce downstream flooding impacts.

The integration of a continuous monitoring and automated control (CMAC) system strengthens long-term performance but remains within the scope of a nature-based restoration rather than a hybrid (engineered) project.

**2. Social Vulnerability Index**

The Town of Bluefield is in a low-income geographic area with a moderate SVI score. This corresponds to the ? Moderate Social Vulnerability (0.0 to 1.0)? range.

**3. Community Scale of Benefits**

The proposed retention ponds and overflow channels will benefit multiple neighborhoods, business corridors, and roadway intersections, notably providing safer ingress/egress for the Mobile Estates community. This indicates a community-scale benefit spanning multiple census blocks, including residential, commercial, and public service areas.

**4. Expected Lifespan of Project**

The project includes comprehensive design, long-term sediment and water management (via CMAC), and native vegetation, making it a sustainable flood mitigation measure expected to remain effective for over 20 years with routine maintenance and monitoring.

**5. Remedy for NFIP Probation or Suspension**

The project does not remedy NFIP probation or suspension.

**6. Low-Income Geographic Area**

The Town of Bluefield is a low-income area with social vulnerability concerns with flood risks posing disproportionate impacts. The project's mitigation directly improves safety and accessibility for these residents.

**7. Chesapeake Bay TMDL BMP Implementation**

The floodplain and pond restoration will reduce sediment and nutrient runoff through dredging, vegetated buffers, and controlled stormwater release-qualifying as Chesapeake Bay TMDL Best Management Practices (BMPs).

# Budget

## Budget Summary

### Grant Matching Requirement\*:

LOW INCOME - Projects that will result in nature-based solutions - Fund 95%/Match 5%

Is a match waiver being requested?

Match Waiver Request No

Note: only low-income communities are eligible for a match waiver.

\*:

I certify that my project is in a low-income geographic area: Yes

Total Project Amount (Request + Match)\*: \$4,651,835.00  
\*\*This amount should equal the sum of your request and match figures

REQUIRED Match Percentage Amount: \$232,591.75

## BUDGET TOTALS

Before submitting your application be sure that you meet the match requirements for your project type.

### Match Percentage:

5.00%

Verify that your match percentage matches your required match percentage amount above.

Total Requested Fund Amount: \$4,419,244.25

Total Match Amount: \$232,591.75

TOTAL: \$4,651,836.00

### Personnel
